## GIGANTIC NEWS

### B1651 BAND SAWMILL

- ✓ Sawing logs up to 1651 mm and sawing slabs (wide boards with a natural edge) up to 1500 mm wide.
- ✓ Easy Set motorized height adjustment and Pro Set computer networks, for intelligent control, a great help in programming the cuts you want to make. And Pro Feed, smart power feed control.
- ✓ It has a unique feature where you can saw both massive and small logs in the same efficient and precise way, making the usability very broad.

Scan the QR code with your mobile for more info and technical data on B1651.

# Upgraded band sawmills and new innovative accessories

Logosol is launching new smart control systems. When purchasing, you can choose either Cut Set or Easy Set for adjusting the saw cut. You can also add Pro Set, an intelligent control of Easy Set. If you have Pro Set, you also have the option to add Pro Feed, which feeds the saw head back and forth through the log.

## TWO DIFFERENT OPTIONS FOR SAW CUT ADJUSTMENT

**NEW!**

Standard on B751 PRO and B1001.

### Cut Set (manual height adjustment)

The market's best manual crank with millimeter scale on the market gives you a precise adjustment of the saw head. The ergonomic design gives you a comfortable sawing experience. A Last Cut indicator on the height scale remembers your last cut and provides a clear reference for the next one.

You work quickly and comfortably and get a perfect cutting result. The saw cut adjustment crank also has a push handle that guides the saw unit back and forth through the log.

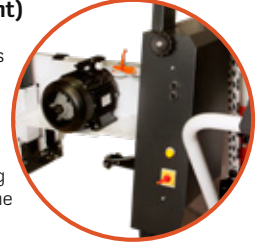

SEE PRICES ON PAGE 4-5

**NEW!**

Fits B751 PRO 8 kW & B1001 12 kW  
Coming to the petrol variants shortly.

### Easy Set (motorized height adjustment)

Simplify height adjustment and avoid hand cranking with the Easy Set! The Easy Set makes it easy to raise and lower the saw head at the touch of a button.

After adjusting the saw head, the position is read on the scale, and fine-tuning is done using an adjacent knob. This allows you to position the saw blade exactly where you want it easily.

It is possible to add Pro Set, the automatic height adjustment, to the Easy Set. Then, you can also add Pro Feed, our smart feed that moves the saw head back and forth on the rail at an adjustable speed.

SEE PRICES ON PAGE 4-5

## DATA CONTROL OF EASY SET

**NEW!**

Fits B751 PRO 8 kW & B1001 12 kW  
Coming to the petrol variants shortly.

### Pro Set (automatic height adjustment)

Pro Set, is a computer setworks, an intelligent control of the Easy Set that you can program for different saw yields. All the cutting information is available on a display, and you easily control the exact position of the saw head at the touch of a button.

Program which cuts you want to make, either individual thicknesses or a series of the same thicknesses.

Pro Set is ideal for those looking for high quality and ease of sawing.

Pro Set requires Easy Set.

**Electric motor**  
400 V **£ 1 250**  
8250-000-0050

**NEW!**

Fits B751 PRO 8 kW & B1001 12 kW  
Coming to the petrol variants shortly.

### Pro Feed (smart controller to drive the saw carriage back and forth)

From a control unit at the end of the sawmill, you can drive the saw carriage back and forth on the rails at an adjustable speed.

The operator arm is foldable for an optimal overview when sawing. You don't have to walk with the saw carriage in noise and sawdust spray, and the feed rate is even and optimized for best results.

Very ergonomic design and is easy to use.

The feed is combined with the Pro Set, where you can also set the saw cut from the operator arm.

### WARRANTIES FOR A SAFE BUY

When you buy a new machine from LOGOSOL, you receive a 5-year warranty. Here we could have set out the warranty terms that are in the catalogue, but we say for the sake of simplicity that we always try to be really understanding if something goes wrong. We believe that it's best for everyone in the long run if you continue to be completely satisfied with your Logosol machine.

2-month money-back guarantee – as it should be! When you get your new machine, you can take plenty of time to test it and make sure that it meets your expectations. Run the machine. Saw or plane a larger volume to see if it works as expected. We're not afraid to take back a machine with a little sawdust. You will only have to pay for the cutting equipment you've used and return shipping. That's all.

All prices and offers in the campaign are excl. VAT and shipping and are valid until 10<sup>th</sup> of June 2024.
